Office Action Summary	Application No.	Applicant(s)
	10/647,967	RODRIGUEZ ET AL.
	Examiner Christopher Boswell	Art Unit 3676

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 29 September 2006.
- 2a) This action is **FINAL**. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-19 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on 27 August 2003 is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) Notice of Informal Patent Application
- 6) Other: _____.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 2,911,815 to Crepinsek.

Crepinsek discloses a lockset having a lock mechanism (1) including an actuator (39) having an aperture (cut out 40 that receives element 36 in meshing engagement), an operator (7), and a turn button (38) mounted in the operator, the turn button having a head portion (220), and a shaft (230) having a leading helical end portion (the anterior end of element 36 that is in meshing engagement with element 39, via element 40), and means for self-alignment (column 3, lines 61-69; wherein after the alignment has been achieved the lock mechanism can be actuated from a locked condition) of the shaft with the aperture of the lock mechanism as the shaft is inserted into the aperture, as in claims 1, 4, and 7.

Crepinsek also discloses the leading helical portion having a plurality of leading helical surfaces (37 is comprised of two half helical arcs) that taper and twist from a transition line of the shaft toward an end of the shaft (figures 1-3), as in claims 2, 5, and 9, as well as the plurality of helical surfaces smoothly transition between adjacent helical surfaces (a gentle arc transitions from one helical arc to the other; figure 2), as in claims 3, 6, and 10, wherein once the leading

helical end portion engages the aperture, a rotation of the turn-button effects a corresponding rotation of the rotatable actuator of the lock mechanism (column 3, lines 61-69), as in claim 8.

Crepinsek further discloses the operator is a door knob (7), the shaft of the turn-button extends from the head portion through the door knob to engage the aperture of the lock mechanism, as in claims 11 and 17, and where a rotation of the turn-button effects a corresponding rotation of the aperture of the lock mechanism (column 3, lines 61-69), as in claims 12 and 13, as well as the aperture of the lock mechanism has a substantially rectangular shape (the lock bolt has a cross-sectional shape that is substantially rectangular, figure 1), as in claims 13, 15 and 18, wherein a number of the plurality of leading helical surfaces is greater than two (the examiner considers the helical surfaces to be 4, one helical surface on each side of the turn-button, and one helical surface connecting the aforementioned helical surfaces at the top and bottom of the aforementioned helical surfaces), as in claims 14, 16 and 19.

Response to Arguments

Applicant's arguments, see page 6, line 8-page 7, line 7 of the remarks, filed September 29, 2006, with respect to the rejection(s) of claim(s) 1-10 and 12-16 under 35 USC 102(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of a newly cited reference.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to locking assemblies with helical actuation elements:

U.S. Patent Number 6,860,529 to Chong et al., U.S. Patent Application
Publication Number 2006/0185409 to Sun et al.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Boswell whose telephone number is (571) 272-7054. The examiner can normally be reached on 9:00 - 4:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Glessner can be reached on (571) 272-6843. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
